

Reconstruction of sports field and school yard of secondary school

"Kuvendi i Junikut"
Projekti për investime kapitale

UN@HABITAT Sida

ABOUT THE PROJECT

The Municipal Spatial Planning Support Programme in Kosovo (MuSPP), implemented by UN-HABITAT and funded by the Swedish International Development and Cooperation Agency, (Sida) started in 2006. The Programme's intention is to support selected municipalities in Kosovo with on-the-job assistance and technical advice regarding spatial planning and urban design. Junik is one of the partner municipalities of MuSPP.

Municipality of Junik issued a decision on drafting of Municipal Development Plan (MDP) in 2009. After two months, an inter-institutional agreement was made between Municipality and MuSPP/UN-HABITAT to support the municipality in the drafting process of MDP, which was also followed by a cooperation agreement between municipality and CHwB (Cultural Heritage without Borders) as well as between the municipality and the Institute of Spatial Planning (ISP) within the Ministry of Environment and Spatial Planning (MESP).

During the event marking the World Habitat Day held in Junik, in October 2009, pupils of primary and secondary school highlighted the need for reconstructing the sports and recreational fields. The lack of sports-recreation fields was indicated in the profile of Municipal Development Plan (MDP) and its implementation plan gave the priority to this issue.

For this reason the project Reconstruction of sports field and school yard of secondary school "Kuvendi i Junikut" was selected as a capital investment project (CIP) and approved by the municipality and UN-HABITAT.

The lack of sports and recreational fields is the main issue for the community of Junik particularly for the youth and active citizens interested in sports and culture. Taking into consideration that there is no vacant land in the municipal property, is clear that the school's yard may fulfil a broader role.

WORKING PROCESS

The CIP process was developed by involving key actors into the development of the project such as, pupils, parents, teachers and activists who participated

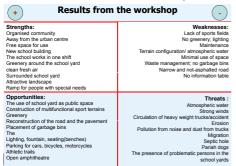

in two workshops.

THE FIRST WORKSHOP

In the first workshop some idea proposals of the location of the project were prepared through the group work. Strengths, weaknesses, opportunities and threats were identified through SWOT analysis as well as the questionnaire was filled up by all participants.

Views from the first workshop

Results of the questionnaire

- 1. Travel to school? 1. 61% walking
 - 2 26% car
- 9% combined
- 2. Barriers you meeti during the travel?
- 42% un asphalted road 19% lack of pavements
- 17% circulation of heavy weight
- trucks 3. What does the school vard lack?
- 19% sport terrain
- 18% lack of greenery
- 11% deragulated environment, not
- relaxed, without seats 4. Most practiced sports activities?
- 1. 26% football
 - 18% handball
 - 3 17% haskethall
 - 4. 14% athletics

- 17% Greenery
- 5. Necessary elements for the school yard
- 15% Sport terrains
- 12% Seats
- 11% Garbage bins, space for use: open cinema, concert stage
- 6. The use of the open space of the school
 - for activities such as: 33% cultural activities
 - 27% sport activities
 - 16% fair, exhibition
- 7. Who else except pupils would use the
 - open school space? 1 39% citizens
 - 2. 25% sportsmen
 - 3. 19% youth

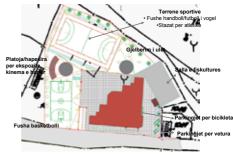

THE SECOND WORKSHOP

In the second workshop two scenarios with idea proposals were designed based on work and results from the first workshop.

FINAL DESIGN

There were some suggestions given in the second workshop to combine the 1st and the 2nd scenario. As a result a 3rd final scenario was developed. It was completed by the municipal staff and supported by UN-HABITAT experts who co-operated through all the phases of the project design and implementation. The project has passed through all approval phases, public discussion and final design. It received the approval and co-financing agreement between Municipality of Junik and UN-HABITAT/MuSPP was concluded.

The construction of the project was tendered out. The municipality of Junik has managed the process and successfully finalised the project in line with the conditions and standards in force
